

How to: Move stray single pages out of an edition (where they have been converted to false spreads)

Moving stray singles out of an edition is easy. These (odd-numbered single pages) come about if you change a single page to a DPS.

- 1) In the navigation panel of your Fred pages, multiselect all the stray pages. (Control + left click)
- 2) Once you have done that, let go of Control and right click.
- 3) All being equal you should see this:
- 4) Check the Logical Page checkbox and click OK.

- 5) Left-click the properties entry at the bottom of the pop-up menu
- 6) That should bring up this dialogue box:

- 7) Check the Logical Page checkbox and click OK.
